July 22, 2017

Statement Regarding Threat Advisory

Public safety agencies in our region, including fire and emergency medical services, have received a threat advisory from the regional Kansas City Terrorism Early Warning Interagency Analysis Center (KCTEW). The advisory does NOT contain a local specific threat to any one agency or provider group but contains information regarding a general threat directed toward all first responders. The Heart of America Metro Fire Chiefs Council and the KCTEW have forwarded this information through appropriate official channels to local agencies as an advisory to our personnel to exercise vigilance and caution.

For additional information, the Heart of America Metro Fire Chiefs Council suggest contacting local law enforcement agencies.
